

When Your Health Team Works

Performance Improvement Facilitator Training

Join us at this **three-day intensive workshop** to expand your knowledge of process and quality improvement, planning and implementing sustainable change initiatives, and influencing without authority. This course focuses on the transition from incremental performance improvement efforts to sustainable transformation by exploring deeper into key concepts.

PF 201 Denver-based training: October 24-26, 2017

The PF 201 level course is for experienced practice facilitators, practice managers and quality specialists.

Attendees will learn:

- ✓ How to lead your organization through the evolution from fee-for-service payment models to value-based accountable care
- ✓ How to move beyond small tests of change to a data-informed strategic plan for sustained organizational change
- ✓ How to implement Project Management and LEAN process skills in project planning, implementation and evaluation
- ✓ How to navigate human challenges associated with change initiatives including teaming, engagement and organizational culture change

The content presented and the process by which it was presented was a paradigm shift for me. The 201 training was immediately applicable and excellently executed from start to finish.
