HealthTeamWorks Helps Transform the Way the Care is Delivered

HealthTeamWorks exists today to solve complex healthcare problems in the pursuit of **health, equity, and resilience.** HealthTeamWorks collaboratively transforms healthcare through performance improvement, organization development, and training resulting in a strengthened community and culturally responsive high-quality care.

Performance Improvement

HealthTeamWorks' expertise and solutions aim to improve outcomes and efficiency while reducing costs and risk. We identify key performance priorities and objectives, and leverage quality and process improvement principles to achieve your goals.

Organization Development

HealthTeamWorks focuses on helping organizations build capacity for meaningful change. We assess the current state, clarify strategic focus, and help you define a clear path forward, offering a significant competitive advantage.

Training

HealthTeamWorks' training programs transfer knowledge, build capabilities and skills, and enhance productivity, ultimately resulting in high-performing, highly engaged individuals, teams, and communities.

Focus Areas

Increase Successful Alternative Payment Models Participation

Foster Resilience in Primary Care

Bridge Clinical, Public Health, and Communities

Where Innovation Meets Evolving Needs

Providing optimal care while remaining profitable requires changing how we think about and approach healthcare. HealthTeamWorks is here to support the innovations and evolutions needed to succeed. We have captured key drivers of healthcare innovation within our Interactive Change Package, and we use this knowledge to implement proven change ideas. As connectors, creators, and change-makers, we help others to not only survive but thrive in a dynamic health environment.

- **Provider & Care Team Resilience**
- **High Quality**

HealthTeamWorks®
Health. Equity. Resilience.

Selected Services

Transitioning to Value-Based Payment Models

We conduct an analysis of your organization's unique strengths and gaps to provide you with a detailed opportunity analysis with a roadmap for implementation. As leaders in training and preparation for value-based advanced **alternative payment models**, we have the experience to guide you from risk to readiness.

Diversity, Health Equity and Inclusion

Designed for groups committed to advancing health equity by improving the experience and quality of care for all patients, this training spurs meaningful self-reflection and effective action planning across your organization. We cover key health equity concepts including **cultural humility, allyship, and Social Determinants of Health**.

Essentials of Care Management

In this training, Care Managers gain skills to **integrate into the care team, implement key processes, and activate patients** to adequately address their health care needs.

Intermediate Care Management

Our trainers help experienced care managers to work with high and rising-risk populations, integrate & manage interdisciplinary care teams, build team and organization networks to **meet population health needs and demonstrate the value of care management programs.**

Population Health Infrastucture

We view population health as a strategic and focused approach to meet the needs of individuals within an empaneled, risk-stratified population. We coach to use actionable data and an **inter-disciplinary team** to deliver appropriate acute, preventive, and chronic care to improve the overall health of the population.

Behavioral Health Integration

We address the crisis of unmet behavioral health needs and the resulting outcome disparities by increasing **behavioral health integration** in primary care. Our team also provides training and technical assistance on effective leadership strategies to assess and **mitigate burnout by providing support** to practice care teams.

Leading Care Management

Customized to align with organization priorities, this covers the importance of a **population health strategy and care management infrastructure**. Topics range from gaining consensus across leaders on measures of success to defining resourcing for seamless, integrated care.

Clinical Health Coach & V-Fusion Training

Comprehensive online training for health professionals who want to improve **patient self-management support skills**. Through the additional v-Fusion option, learners can engage in weekly live virtual learning sessions.

Practice and System Transformation

Our transformation approach builds on the strengths of practices to achieve clinical quality aims while **optimizing the care team and reducing turnover.** We support practices in using timely actionable data to improve patient and family engagement, integrated services, and community-clinical linkages.

Strategic Alignment and Business Planning

Our transformational **strategic planning and alignment process** is designed to bring together the right stakeholders to work towards a shared vision. We analyze organizational data, industry trends, and potential risks, and provide a framework to formulate a final measurable and time-bound strategic business plan.

Community Health Worker Training

We use a blended learning approach to **advance the development of professionals in CHW and related roles.** This training meets nationally-established standards and offers continuing education credits and a professional skills certificate.
